

BUILDING A **GREENER** INFRASTRUCTURE

ABOUT SLADE

Slade, a General Contractor for Building Construction, was established in 2006, and is a multi-disciplined construction and program management firm that specializes in environmental services, geotechnical services, construction material testing, and urban planning. Slade has built their reputation one project at a time. Slade's principal office is in Birmingham, AL and does business in Atlanta, GA; Charlotte, NC; Nashville, TN; Dallas, TX; and Greenville, SC. Slade has consistently maintained a reputation for excellence in construction and environmental services.

WE BUILD BASED ON PURPOSE

- Providing Geotechnical, Construction Material Testing, and Environmental Services
- Providing Superior Quality Project Management and Construction Management
- Providing General Contracting Services
- Providing Safety and Construction Quality Control Services

ENVIRONMENTAL SERVICES

Our primary focus has been environmental services that includes: Phase I, II, and III Environmental Site Assessments, Ground Water and Soil Testing, Asbestos Inspections, Lead Inspections, Brownfield Redevelopment, Remediation, Restoration, Risk Assessment, Hazardous Materials Surveys, Environmental Remedial Investigation, Cultural Resource Studies, Wetlands Consulting, Environmental Permitting, Solid and Hazardous Waste Management/Compliance, Project Management, Sustainability, and Energy Efficiency. Our key personnel include registered LEED Accredited Professionals. We also serve as experts in environmental and transportation litigation.

CONSTRUCTION MATERIAL TESTING AND INSPECTIONS

Testing services must be conducted both accurately and timely, in order to add value to our clients. Slade provides a laboratory to test for verification of conformance to specification documents; testing and evaluation of materials; observation of construction procedures; developing design criteria and evaluating strength and properties of construction materials for projects. Our personnel assigned to your projects are fully qualified with experience in various aspects of testing and inspections. These technicians are trained and certified through nationally recognized agencies such as ACI, DOT, and ICC. Slade can develop and implement special testing procedures to meet the unique needs of your project.

GEOTECHNICAL SERVICES

Slade's Geotechnical Testing Services evaluates earth materials, such as soil, rock, and groundwater to determine how they interact with structures, such as building foundations, retaining systems, and roadways. Our geotechnical and testing expertise is often used in small and large multidisciplinary designs and is frequently sought by clients as a service in its own right. From preliminary design and analysis through testing and observation during construction, Slade's geotechnical consultants can provide the expertise for long term, and cost-effective solutions.

CONSTRUCTION GROUP

In the construction venue, our staff can provide you expertise in general contracting, program management and construction management related to construction services. Slade has a strong background in providing services in Construction Quality Control, Safety, Building Information Modeling (BIM), and Lean. The projects range from industrial, education, airports, government, financial institutions, road ways, and health care.
